Occasionally Additional Tasks May Be Required For Data
Rebuilding After The Installer Completes. The Tasks Are Visible
And Must Be Allowed To Complete.

TROUBLESHOOTING!

Security:
Most Common Errors Are Due To The User's System Security
Whether It Be User Installed Or Within Windows.
Be Aware Cracks Or Tools Required May Be Detected As Suspicious
And Blocked Or Removed.

Memory:
Memory Hungry Apps And Hidden Tasks Can Often Push Users
Under The Recommended Requirements The Installer Needs.
Whether It Be Physical Or Virtual Memory. This Can Cause The
Installer To Display A CRC Error. It Can Be Corrected By
Increasing Your Virtual Memory. In Most Cases Installing
In Safe Mode Can Also Bypass This Issue.

Installer:
Our Installer Has Been Changed Around Many Times. As Of Its
Last Update We Have Had No Issues So Far.

Redistributables:
We No Longer Force Execute These After Install As Requested.
If The Source Came With Any They Can Be Found In The Games
Root Folder Labeled Extras. Run These To Avoid Ucredist And
DirectX Related Errors.
